

ZANY ZEBRA

You will need:

10 sticks of any color
26 black sticks
19 white sticks
5"x12" foil

Scissors 

2 Step 2:

Curve the long strip of sticks back to the chest. Wrap 1 stick around the neck and front legs to secure them.

Crumple 3"x8" foil into a tapering egg shape. Separate the loops and press the foil in between, as shown. Crumple a 3"x4" foil into a small cylinder and insert it into the neck space.

4 Step 4:

Press a black spiral against the nose and continue wrapping 1 black stick. Make 2 small loops at both ends of a black stick and wrap them under the neck, pressing against either side of the head.

6 Step 6:

Use 1 black stick to wrap the hooves, trimming with scissors after each hoof is wrapped.

8 Step 8:

Cut and fold 2 small pieces of white stick to fill in the ears.

1 Step 1:

Crumple foil into an egg. Arrange 3 strips of 3 sticks as shown. Fold the short end around the back section to secure it. Leave the center stick extended. Fold the sticks down around the foil for the legs. Fold one stick up on each leg where indicated.

3 Step 3:

Twist 1 black stick around the top of the tail and around 1 leg. Fold 1 black stick in 3rds and press it against the tail. Cut the ends apart.

5 Step 5:

Press together an alternating section of 2 white and 2 black sticks. Wrap the top of the tail, around one leg, and under the belly. Repeat with 2 more sections of 2 black/2 white. Continue wrapping the neck and head using 2 smaller sections of 1 black/1 white each. Wrap each leg in a section of 1 black/1 white.

7 Step 7:

Fill in the uncovered parts of the zebra by lining the areas with sections of 1 black/1 white, and trimming with scissors. Use about 6 sections all together.

9 Step 9:

Using a section of 1 black/1 white, make a wavy zig zag pattern as shown. Wrap both sides of the bottom edge in 1 black stick, cutting off the extra. Trim the top with scissors. Make one side shorter than the other. Press between the ears and down the neck.
